LUXAFLEX® MODERN ROMAN SHADES

Traditional and Tailored Shades with LiteRise Operation

Just when you thought Luxaflex Modern Roman Shades couldn't get any better, Traditional and Tailored styles are now available with LiteRise Operation for enhanced support and smoother control.

To lower, gently pull down on the bottom rail handle. The shade will retract slightly to the desired height.

To raise, gently pull down on the handle to engage the shade. Then steadily raise the shade into the headrail or retract the shade to the desired position.

Traversed Shades with Split Stack

Luxaflex Traversed Modern Roman Shades now span up to 9 metres with the Split Stack option. These large spanning widths are achieved by joining two headrails. If a shade exceeds 4860mm width, two headrails are butted in the centre of the shade which also features a fabric tab/connector on the fabric covered headrail.
